

Dahle 20434 High Security Shredder

NSA/CSS O2-01 Approved

20434

Shred Size - 1mm x 4.7mm
 Capacity - Up to 8 sheets*
 Security Level - 6
 Max Hp - 1/2 Hp
 Semi-Automatic Features

In order to protect our National Security, military and government agencies require higher levels of security from their paper shredders. This Dahle High Security Shredder is NSA approved for **NSA/CSS Specification 02-01**.

The Dahle 20434 is designed to be used in a small office or by a team of employees for the destruction of top secret documents. It features electronic sensors that will turn the shredder on when you're ready to shred and turn it off when the shred compartment is full or open. It's these state-of-the-art features that save you time and take the burden out of shredding your documents.

This shredder is a serious machine that uses a matched pair of solid steel

cutting cylinders that are capable of reducing a single sheet of paper into over 15,500 tiny particles. These particles are so small that they have been rendered impossible to reassemble.

As the U.S. continues to face security threats on a global level, Dahle will continue to offer solutions without compromise to operation or dependability. This machine is perfect for military, federal, state or local governments as well as Department of Defense contractors engaged in projects where National Security is an issue. In a world of uncertainty one thing's for certain, whatever you put through this shredder, we guarantee will never be read again.

Dahle High Security cutting cylinders reduce a sheet of paper to over 15,500 pieces.

The shredder's toggle switch allows for Automatic on/off, continuous run, and reverse operation.
